Education

Cornell University, College of Engineering

B.S. in Computer Science, Minors in AI & Entrepreneurship
GPA: 3.942

Ithaca, NY

Expected Graduation May 2027

Coursework: Distributed Computing, Compilers, Systems for Large-Scale ML, Systems Programming, Operating Systems, Algorithms, Computer System Organization, Cloud and ML Hosting, Deep Learning, Quantum Computing
Skills: Python, C/C++, C#, Java, OCaml, React, CUDA, PyTorch, Hugging Face, .NET, GitHub, vLLM, Microsoft Azure

Work Experience

Google

Incoming Software Engineer Intern

08/26 - 11/26

New York, NY

Meta

Incoming Software Engineer Intern

05/26 - 08/26

Menlo Park, CA

Microsoft

Software Engineer Intern

05/25 - 08/25

Redmond, WA

- Developed **C# app** to automatically assess codebase regression risk across **8000+ pull requests per day** in Azure
- Re-architected system to remove polling and redundant API calls, **decreasing** compute and response time by **33%**
- Automated repository onboarding process via GitOps, **reducing** time to onboard new teams from **days** to **minutes**

LinkedIn

ASCEND Intern (Software Engineer)

09/24 - 05/25

Ithaca, NY

- Built AI-powered full-stack **React** web app to practice behavioral interview skills, utilizing **Next.js** and **Supabase**
- Established **Llama 3.2** inference pipeline with **Hugging Face** to generate feedback on the quality of user answers
- Refactored deployment to prefetch and host LLM on separate **Flask** server, reducing inference time by over **89%**

Microsoft

Explore Intern (Software Engineer)

05/24 - 08/24

Redmond, WA

- Deployed **ASP.NET** web app to simplify cloud cost management for **100+** internal Azure teams with 2 teammates
- Created spend dashboard using **C# Azure SDK**, reducing the number of clicks to set and enforce budgets by **93%**
- Refactored backend API calls and streamlined business logic, decreasing time to load website pages by over **61%**

Projects

GitDistributed | C++, TCP/IP Networking, Sockets, Multithreading, Distributed Computing

02/25 - 05/25

- Led team of **8** to build **distributed version control service** in **C++**, supporting the **5** most essential **Git** commands
- Replicated remote Git repository using the **Primary-Backup** model, reliably tolerating **50%** of all server failures
- Implemented **TCP/IP** communication using **C++ sockets**, allowing **concurrent** connections to **3+** other **servers**
- Developed **serialization** scheme for **6** datatypes and **multithreaded** timers for **realtime** server health **monitoring**

Quantization on Edge | Python, ONNX, Tensorflow, Machine Learning

02/25 - 05/25

- Led 6 teammates to **quantize CNN** model in **Python** and benchmark results when deployed to Jetson Nano device
- Implemented dynamic and static post-training quantization, reducing model **size 4x** while retaining **98%** accuracy
- Developed model compiler pass in **ONNX** to utilize custom fused operators, **speeding up** inference by **over 50%**

Leadership Experience

Vice President | Cornell Data Science Project Team

05/25 - Present

Leading Cornell's largest data science club, spanning **9 projects** across **60+** club **members** and **2** corporate **sponsorships**

Academic Excellence Chair | National Society of Black Engineers

09/23 - 05/25

Organized **5-member** committee to create workshops, **improving** course performance and time usage for **400+** **students**

Founder | Food for All NYC

06/22 - 05/24

Orchestrated team of **10** and managed **2** corporate **partnerships**, donating **~20,000 pounds** of **food** across **2,000+** **schools**
